PROFESSIONAL SUMMARY

Motivated and Aspiring Software Engineer with experience in Development, deployment, and cloud fundamentals. Proficient in building practical projects, including web and mobile applications and automation scripts. Strong skills in debugging, and problem-solving. Actively expanding a portfolio to prepare for future software engineering roles focused on impactful work.

TECHNICAL SKILLS

Cloud & DevOps: Amazon web service, Git/GitHub, Docker and CI/CD concepts

Programming & Web: HTML, CSS, Python, SQL, React Native, Terraform, Kubernetes, Java Spring Boot

Tools: VS Code, AWS Management Console, AWS CLI

Core Competencies: Product Management, System design, Problem-solving, Prompt engineering, TDD

PROFESSIONAL EXPERIENCE

Platform Engineering Intern

May 2026 – Present Interswitch Group

- Contributed to infrastructure optimization and CI/CD pipeline automation to enhance deployment efficiency.
- Collaborated with engineering teams to monitor system performance and troubleshoot cloud-native infrastructure issues.
- Assisted in migrating legacy services to containerized environments, ensuring scalability and high availability.

IT Intern

March 2026 – April 2026 Addossa Microfinance

- Managed internal IT systems and provided technical support to ensure seamless branch operations.
- Automated routine data entry tasks using Python scripts, significantly improving record-keeping accuracy.
- Maintained hardware/software inventory and supported the digital transformation of manual financial tracking processes.

Cloud & DevOps Intern

August 2025 – September 2025 Covenda AI

- Configured AWS Cognito and integrated with Amplify Auth for secure authentication in a React application
- Reduced cloud costs by auditing and removing unused AWS resources across multiple regions
- Developed Next.js platform homepage and created technical documentation for authentication workflows and ML architecture

EDUCATION

BACHELOR'S DEGREE | Computer Science | Covenant University | CGPA: 4.90/5.00

2023 - 2027

PROJECTS

Customer Complaint System (AWS Serverless)

Built a serverless app using Lambda, DynamoDB, and API Gateway with CloudWatch logs + REST APIs and basic IaC.

Secure 2-Tier Web App (AWS VPC)

Configured VPC with public/private subnets; deployed EC2 + RDS; implemented SGs, route tables & NACLs.

Food Delivery App (React Native)

Designed a functional mobile UI with categories, restaurant lists, and mock APIs.

Mood Detector (ML + CV)

Trained a model on Kaggle data to classify emotions from images/live camera input.

Clario

A platform to help secondary school students figure out opportunities ahead before JAMB.

Rota

A rotating saving group API for the traditional group ajo.

Nuru AI (ongoing)

The Engineering Intelligence Platform for Energy Transition.

Q&A App (Gemini API)

Integrated Gemini API to answer user questions in real time.

GetBetter – Self-Improvement Platform

A personal goal-tracking platform with time-based logging to foster continuous development.

CERTIFICATIONS & CONTINUOUS LEARNING

AWS Certified Cloud Practitioner (In Progress) | Huawei ICT Security Certification | OpenBinacle Prompt Engineering Certification | Frontend Masters – Introduction to Backend Architecture | Frontend Masters – Introduction to Devops | DataCamp – Introduction & Intermediate Python for Developers | Deloitte Cybersecurity Job Simulation (Forage) | Introduction to Linux (Linux Foundation) | Introduction to Kubernetes (Linux Foundation)

CAMPUS INVOLVEMENT

Hebron Startup Lab | Member | 2024 – Present

Google Developers' Group | Member | 2025 – Present

Enactus | Member | 2024 – Present

AWS Skill Builder CU | Director of Marketing | 2025 – Present
